WORK EXPERIENCE

Trainee Software Engineer -QA

CitiusTech Healthcare Technology Private Limited

07/2022 - 06/2023

Pune, India

CitiusTech is a specialized provider of healthcare technology and business process services to healthcare technology companies, healthcare providers, managed care organizations, health plans, and disease management companies.

Project

- Davita CWOW -(CSB Application):

- **Description:** This project application helps its user to define new studies and add periods within them. Application also allows user to assign various clinics, physicians, and orderable items to the study. Clinical Study Billing Application can also allow user to register patients for the study. This information then flows to downstream clinical systems. After order is placed and marked as given in clinical systems, details flow to Nautilus for billing Purpose.

- **Tools:** JMeter, ALM Tool

- **Main Technologies:** Manual Testing , Performance Testing

- **Responsibilities:** Test Cases execution and validate test data on ALM tool,

- Prepare Test case Execution Report.

- Ability to generate and analyze Performance test result. Parameterization, Correlation , Capture Test Result.

- Parameterization, Correlation , Capture Test Result.

EDUCATION

Bachelor of Engineering

Shri Ramdeobaba College of Engineering and Management, Nagpur

08/2019 - 06/2022

Nagpur, Maharashtra

India Courses

- Electronics Engineering with 7.07 CGPA

Diploma

Government Polytechnic, Nagpur

08/2016 - 06/2019

Nagpur, Maharashtra

India Courses

- Electronics & Telecommunication Engineering with 76.85%

SSC

Jawahar Kanya Vidyalaya, Saoner

06/2015 - 06/2016

Saoner Maharashtra

India Courses

- 10th std with 85.40%

SKILLS

Performance testing

JMeter

REST API Testing

Postman

Manual Testing

HTML & CSS

SQL

PERSONAL PROJECTS

Air borne Filtration and Monitoring System (08/2022 - 04/2023)

- **Descriptions:**

- In this Project, we have built filtration system using Activated carbon Granules, scrubbing technology using Na₂CO₃ Solution sprayer and HEPA filter to purify the air. For comparing impurified as well as filtered air we built monitoring system, which we used Arduino microcontroller technology with the help of MQ135 gas sensor for monitoring and using wi-fi module sends the information to the cloud displayed the plot data as graphical statistics on the screen as well as displayed the data in PPM on LCD (liquid crystal display).

- **Role:**

- Understood the requirements

- Find out the chemicals and techniques for Air Purification

- Design the PCB Plate for Monitoring system

- Designed code under the guidance

CERTIFICATE:

Certificate of Completion in Learn JMeter from Scratch on Live Apps – Performance Testing (From Udemy)

Certificate of Completion in Wanna Learn JMeter? Get Training by Industry Experts-23+hrs (From Udemy)

Certificate of Completion in Postman: The Complete Guide – REST API Testing (From Udemy)

Crash Course on Python (on Coursera) (05/2020)
